Insects and Circular Value Chains: Opportunities and Applications

Insects for a Circular Future

The circular economy is becoming increasingly important and insects play a key role in this transformation. The two Interreg projects Realise-Bio and Agropole Innovates warmly invite you to this exciting webinar. Discover how insects provide innovative solutions to use resources more efficiently and transform side streams into high-value products. Experts from practice and research will demonstrate how these approaches not only offer ecological benefits but also create new economic opportunities. You will gain valuable insights into the use of insects and their by-products for animal feed, fertilizers, and other applications. In addition, you will learn how education and knowledge transfer are essential drivers for fostering innovation in this dynamic and rapidly growing sector. The webinar offers a concise overview of current developments, practical examples, and the opportunity to engage in discussion with leading experts.

Programme

The event will be held
in English.

Bob Holtermans
Insect Engineers
& Insect School

Jan-Christoph Morisse
FarmInsect

Prof. Dr. Florian Wichern
Rhine-Waal University

- 14:00 CET Welcome
Realise Bio & Agropole Innovates
- 14:15 CET Insects as a driver for circular value chains:
practical examples and insights
Bob Holtermans, Insect Engineers and Insect School
- 14:35 CET Bringing Insect Frass to Market: Regulatory
Requirements, Production Workflow and
Practical Use Cases
Jan-Christoph Morisse, FarmInsect
- 14:55 CET Potential of insect frass as fertilizer and soil
amendment
Prof. Dr. Florian Wichern, Rhine-Waal University
- 15:15 CET Panel discussion and Q&A session
- 15:45 CET Closing
